

OYEFULE OLUWATAYO

Lagos, Nigeria. LA 101281 | +234-806-652-1719 | oyefuleoluwatayo@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with cognitive knowledge in Frontend and Backend technologies. Creative and analytic with good leadership, soft skills and communication skills, quick to learn new technologies and quick in adapting to change, and working in both team and/or self-directed orientation or setup.

TECHNOLOGY STACK

- **PROFICIENT:** Javascript, C#, .Net, SQL, React, Redux, Typescript, NodeJS, Express, MongoDB, Git, CSS, SCSS, Azure DevOp, Figma, PowerBI
 - **FAMILIAR:** Firebase, Golang, Python.
-

CORE COMPETENCIES

- **Web Development and Design:** adaptation of design trends and standards in designing and developing responsive websites and web applications with the use of modern technologies.
 - **Design and Illustration:** design for brands and identity, logo designs, mockups and general illustration. Product design and User Interface designs.
 - **Database Query and Visualization:** Data visualization using PowerBI and working with SQL and MySQL databases.
 - **Leadership and Communication:** Leadership advocated by good followership, steering collaboration towards meeting set goals by effective planning and spearheading tasks, and ensuring effective communication between every concerned party.
 - **Version control:** Use of Git and GitHub for continuous iteration of products and utilizing CICD for version control and code reliability.
-

PROFESSIONAL EXPERIENCE

2016 - Ade Ojuri and Partners: Intern Architect (Lagos State, Nigeria.)

Developed and executed CAD drawings for new building proposals, resulting in a reduction in project time through the use of MicroStation.

Collaborated with architects to create 3D renders for proposed designs, resulting in an increase in client satisfaction through the use of Google SketchUp.

2023 - Chevron Nigeria Limited: Undergraduate Intern (Lagos State, Nigeria.)

Software Developer - IT (Business Services) Division: Cross Platforms: Application support, website support, Service Now (SNOW) Information Risk Management (Compliance) support. Using C#, .Net frameworks, T-SQL and other technologies.

Developed and executed a website update project for the IT (Business Services) Division, resulting in updated information and increased user engagement

Provided support for migration of data queries from on-premise Oracle databases to Cloud-based platforms to improve reporting accuracy and efficiency, resulting in reduction in query response time for business intelligence reporting on oil production.

Created visually appealing data dashboards using Microsoft PowerBI to enhance understanding of business intelligence metrics among stakeholders, resulting in an increase in data-driven decision making.

EDUCATION

In-view

Bachelor of Technology: Software Engineering

Federal University of Technology, Akure – Ondo State, Nigeria.

OTHER EXPERIENCE AND EXTRACURRICULAR ACTIVITIES

- Enrolled for Meta Spark Augmented Reality Course and created a couple of effects for Spark Holiday Competition 2021 which have cumulatively generated over 5000+ opens and 1000+ impressions as cumulated by Meta's Spark AR Hub - <https://www.facebook.com/sparkarhub/portfolios/ig/gentcod/>
-

ADDITIONAL INFORMATION

I am interested in business and financial markets. Desire to take time to unwind and carry out self-study when feeling less productive. I am also interested in art, politics and human psychology. I am fun-loving and people oriented but specific about personal time and space. Sports enthusiast.
